DELFAST RURAL RANGE

NEW ZEALAND BORN & BRED.

OUR STORY

Supporting the industries at the heart of New Zealand since '92.

Rural, construction, and manufacturing are all industries at the heart of New Zealand. Working in New Zealand's climate and landscapes is unique and has its own challenges, but we're proud to be kiwis. **It shapes our family, and it shapes our brand.**

Grandpa was farming since high school, but in 1964 he made the decision to sell the farm to better support his family. Grandpa then moved his family to Palmerston North, where he developed his sales skills. In 1992, Delfast was started by Grandpa's sons, Andrew and Ian.

Through the relationships we've built with our end-users, we've been able to develop over 1000 product lines that are ideally suited to our end-users' needs. A pivotal point for Delfast was when we saw a need for a better fencing product than what was on the local market. So in 1998, we developed a contractors stapler that changed fencing forever; a product that would last and worked with New Zealand's unique conditions.

Grandpa's commitment to people has remained a key part of who we are. Our goal is to create an environment where people are confident to own the Delfast products they have.

To think smarter, not harder for our end-users; to make building the best, effortlessly.

ACCESSORIES

Air Tool Oil

Designed to lubricate pneumatic (air) driven tools of all types. They possess extreme pressure characteristics for longer tool life under the most demanding conditions.

They also contain rust and oxidation additives for protection from moisture. The naturally high viscosity index provides protection for operating during cold temperatures as well as hot.
