# HEATING

Your guide to home heating, cooling  
and ventilation products

## INTRODUCTION

### PLACEMAKERS HEATING RANGE 2022

#### THE LATEST HEATING SOLUTIONS FOR YOUR HOME

With so many product options and pathways to achieve a similar result, it can be overwhelming deciding what is best to suit your home when it comes to home heating, cooling and ventilation. What we seek at the end of this journey, is a healthy and comfortable environment.

No matter if you are seeking a healthy home solution for a rental property, a low cost result for a short term or first home, or perhaps a modern, super-efficient technology fuelled smart home solution, the extensive range of heating products available from PlaceMakers will provide something for every requirement.

New Zealand is host to many climates, so it really isn't a one size fits all approach. We believe we have what you need to meet the needs required to keep your space, or entire home, comfortable dry and healthy.

Our aim is to make the process of product selection easy, no matter if the solution is part of a new build, a renovation or a retrofit. We can even offer tailor made solutions to meet your interior or exterior design.

#### PlaceMakers quality standards

This guide shows products made locally and all over the world. We work with our suppliers to ensure that they all meet NZ standards as well as our own exacting requirements. We always strive to give you the best possible price but never at the expense of quality.

Products featured may not be stocked in all stores but can easily be ordered in for you. Price may vary on alternative size, colour and style options, contact your local store for details. The colour, texture or finish of these products may differ slightly from that advertised due to printing process. Pricing excludes installation, insulation kits and flue kits, unless specified. Prices include fuel bed and zero clearance kit where applicable. Extra features and any additional options are priced separately.

The information contained in this catalogue is intended to provide general assistance to those interested in home improvement projects. Whilst care has been taken in providing the advice and recommendations in this catalogue, PlaceMakers takes no responsibility for the accuracy or completeness of it. PlaceMakers excludes all liability in relation to the statements and information provided in this catalogue.

## HEATING & VENTILATION

Create a sanctuary that welcomes you from the moment you step in the door, with perfectly warm air in winter, cool temperatures in summer, and dry, well-ventilated rooms all year round.

Our heating, cooling, and ventilation systems offer superior comfort, no matter what the weather.

### Wood Fires

There's nothing in the world like lighting a fire on a cold winter's night, then sitting back and watching the mesmerising glow of crackling wood.

Whichever brand you choose, all of our wood fires provide a safe, stylish and reliable source of heat and ambience.

Many of our models can also be used to heat your water supply, helping to cut down on power bills and keep you warm through power outages.

### Gas Fires

All the warmth, atmosphere, and stylish design of a wood fire, without the maintenance. There's a lot to love about gas fires.

With the flick of a switch you'll be luxuriating in front of a warming gas fire that quickly heats the room and creates instant ambience.

### Central Heating

Instant warmth, all throughout the house. Central heating offers ultimate comfort in record speed.

Central heating also offers ultimate control. You can set different temperatures for different zones to suit individual comfort levels, and even control your thermostat from your phone.

This heating style also improves ventilation and reduces condensation – and, if you opt for an energy-efficient model, you'll save on bills, too.

### Heat Pumps

Warmth in winter, cool air in summer, and excellent whole-home temperature control – heat pumps offer year-round comfort for any New Zealand home.

Whether you prefer a wall-mounted heat pump, floor console, or even a ducted system, we can help you select the perfect model for your home.

### Ventilation

Kick out mould, eradicate dampness, and chase away stale air with an industry-leading ventilation system.

A good ventilation system gets fresh air flowing through each room all year round, creating a healthier home environment. It can also reduce electricity costs in winter by pulling warm air from the ceiling to heat your home and fight condensation.

## CHOOSING THE RIGHT HEATING SOLUTION FOR YOUR HOME

### MEASURE THE SPACE YOU ARE TRYING TO HEAT

To determine the space you need to heat, measure the length (L), width (W) and height (H) of your space.

$L \times W \times H = \text{Room Size}$   
(eg.  $5\text{m} \times 3\text{m} \times 2.4\text{m} = 36\text{m}^3$ )

### USE THE CHART TO DETERMINE YOUR REQUIRED HEATING OUTPUT

#### KEY

-  Poorly Insulated/Cold Climate
-  Well Insulated/Warm Climate

Please note: heating output is a guide only. Please talk to our heating consultants for more information.

### REQUIRED HEATING OUTPUT IN KILOWATTS

ROOM SIZE IN CUBIC METERS		
15M <sup>3</sup>	1.1kW	0.5kW
30M <sup>3</sup>	2.1kW	1.1kW
45M <sup>3</sup>	3.2kW	1.6kW
60M <sup>3</sup>	4.2kW	2.1kW
75M <sup>3</sup>	5.1kW	2.6kW
90M <sup>3</sup>	6.3kW	3.2kW
105M <sup>3</sup>	7.4kW	3.7kW
120M <sup>3</sup>	8.4kW	4.2kW

### CHOOSE THE RIGHT SOLUTION FOR YOUR HOME

#### GAS HEATING

UP TO 9KW

##### PROS:

- ✓ Fast and responsive
- ✓ Good space saving options available
- ✓ Cleaner low emission options
- ✓ Ignition at the push of a button
- ✓ Aesthetic options

##### CONS:

- ✗ Un-flued solutions produce moisture
- ✗ Generally only heat one room
- ✗ Subject to gas type availability
- ✗ Requires suitable ventilation

#### HEAT PUMP

UP TO 10KW

##### PROS:

- ✓ More efficient than other electric heaters
- ✓ Programmable thermostatic options
- ✓ Some models provide air filtration
- ✓ WiFi options on selected models
- ✓ Will provide cooling in summer

##### CONS:

- ✗ Less efficient when outside temperature drops
- ✗ Comparatively more expensive to install
- ✗ Can be noisy (particularly for neighbours)
- ✗ Must be installed by a qualified installer
- ✗ Completely reliant on electricity supply

#### WOOD BURNER

UP TO 30KW

##### PROS:

- ✓ Greater heat range 8kW–30kW
- ✓ Cheapest source of heating available
- ✓ Heats a larger area at a consistent rate
- ✓ Provides heat in a power cut
- ✓ Provides cooking option in a power cut

##### CONS:

- ✗ Larger fires require more space
- ✗ More time/work required for wood
- ✗ Dry storage required for fuel/wood
- ✗ Some authorities restrict use
- ✗ Council consent required for installation
- ✗ Ash removal required

#### CENTRAL HEATING

UP TO 35KW

##### PROS:

- ✓ Programmable timer & thermostatically controlled
- ✓ Zone control options available on many brands
- ✓ Forced air systems can be a discrete way of heating your home
- ✓ Can help to reduce condensation and moisture

##### CONS:

- ✗ Can be expensive to install
- ✗ Can be expensive to run if your house isn't well insulated
- ✗ Forced air systems can increase allergies from air movement
- ✗ Radiator systems can be invasive of room space

## BATHROOM HEATING & VENTILATION

A bathroom heater is a great addition to keep you and your family warm in winter after a bath or shower, and also to heat the room ensuring comfort during the cooler months.

A bathroom heater will help keep the room dry, clean and healthy by reducing mould and mildew.

There are a number of solutions available, whether you require wall or ceiling mounted, fan assisted or timed — PlaceMakers has you covered.

## BATHROOM HEATERS

**serene**  
living

The international team behind Serene Industries have been designing, building and distributing world quality home and commercial heating products for over 40 years.

Serene's technically advanced bathroom heaters offer the best solutions for efficiently heating bathrooms and ensuites with both style and elegance.

### S207T LE MINUTEUR BATHROOM HEATER

## INDOOR HEATING & COOLING

Whether you own a small or large home, if you want to heat or cool one room or the whole place, we have you covered. Working with the best heating products for New Zealand's unique climates, we aim to bring the best solutions to suit every New Zealander's needs.

Here at PlaceMakers we want to make home heating solutions simple, providing all seasonality options all year around – whether you require a retro fit option or a new build option for your home heating or cooling, we have you sorted. From electric heaters and heat pumps to heat single rooms, to gas and solid fuel fires and professionally designed central heating systems, PlaceMakers brings a wide range of options never before seen from any other merchant in New Zealand.

Our friendly staff are trained to help you find a heating or cooling solution to suit your individual needs. If you need a new gas connection for the property you are working with, or an installer for your new found home heating or cooling product, we aim to help in providing an end to end solution.

## ELECTRIC HEATERS

**serene**  
living

Serene have over 40 years experience in designing and manufacturing stylish products to deliver warmth and comfort to your home or commercial areas. Their products are built to last with their superior quality giving them the confidence to offer full replacement warranties.

## Dimplex

A competitively priced system designed to save you money.

Energy Control System, coupled with energy efficient Dimplex® panel heaters, allow you to create a whole-home centrally controlled heating system for a fraction of the cost of other central heating systems.

You can also use Energy Control System to complement your existing primary heat source. Many homes have a heat source in the central living area but the other rooms are too cold; leading to sicknesses from prolonged exposure to cold temperatures or temperature fluctuations experienced moving between cold and warm areas.

### DIMPLEX® ALTA PANEL HEATER

- Ultra accurate thermostat ( $\pm 0.3^{\circ}\text{C}$ ) lowers running cost
- Quiet operation
- Designed in Norway, made in UK
- 10 year warranty on element, 7 years on panel (residential warranty)

1000W	1500W	2000W	2400W
7729240	7729242	7729243	7729244

### OPTIONAL EXTRAS FOR DIMPLEX PANEL HEATERS

#### ENERGY CONTROL SYSTEM PANEL HEATER RECEIVER (NCU2R)

- Controls Dimplex® Alta Panel heaters
- Receives signal from Energy Control System HUB and app to provide wireless whole home heating solution
- Developed in Norway
- Energy Control System provides the right amount of heat at the right time
- Simple to set up and install

7729238

#### ENERGY CONTROL SYSTEM HUB

- Distributes signal to NCU2R receivers to enable control of Dimplex® Alta Panel heaters; controlled by Energy Control System app to provide wireless whole home heating solution
- Control from anywhere with internet access

7729237

#### DIMPLEX® ALTA TIMER

- Dimplex® Multi-zone timer
- 7 day programmable energy saving timer
- Set different temperatures for different times of the day
- Plugs into DTD4W range
- LCD display

7762847

#### CASTOR FOR DIMPLEX® PANEL HEATERS

- Castors allow your Dimplex® panel heater to portably move from room to room
- Easy installation

7729245

#### RECESSED SPACE HEATER 2400W

- Attractive slim design
- Powerful, quiet tangential fan
- Fits into existing cut out for Skope 981E
- Optional run timer
- Adjustable thermostat

3804664

#### SURFACE MOUNT SPACE HEATER 2400W

- Easy surface mount
- Powerful, quiet tangential fan
- Optional run timer
- Adjustable thermostat
- Electronic control

3804662

#### EXTERNAL CONTROL SURFACE MOUNT SPACE HEATER 2400W

- Easy surface mount
- Powerful, quiet tangential fan
- Optional run timer
- Adjustable thermostat
- Designed for external control (Building Management)

## GAS HEATING

Utilising gas as a heat source is a fast and efficient way to heat air. Flued gas appliances provide fast, dry heating solutions for your home.

Gas burns much hotter than electric coil alternatives, and gas appliances are not affected by external air temperatures — meaning that the air delivery will be the same temperature no matter what is going on outside.

In New Zealand we use two forms of gas: Natural Gas, which is reticulated around most towns in the North Island and LPG which is stored in bottles and available across New Zealand from various companies.

Flued heating appliances are a preferred option — as the by-product of the burnt gas is expelled outside — eliminating inside moisture issues.

In the South Island Natural Gas is not available, gas consumers have to use bottled or reticulated LPG.

For more information on how to connect to gas, contact [heating@placemakers.co.nz](mailto:heating@placemakers.co.nz) or your nearest PlaceMakers branch for the details.

## GAS HEATERS

### Rinnai

#### INSTANT WARMTH AND SAVE ON YOUR ENERGY BILL

Rinnai's Energysaver gas flued heaters deliver fast, energy-efficient heating, perfect for taking the chill off bedrooms. They also deliver excellent air quality, which is great news for people with asthma or allergies. All of the Energysaver models can be either NG or LPG.

#### RINNAI ENERGYSAVER 309 FLUED GAS HEATER

- Heats up to 3.1kW
  - Fast and energy efficient
- 3801262/4

#### RINNAI ENERGYSAVER 559 FLUED GAS HEATER

- Heats up to 5.3kW
  - Delivers an ultra-clean breathing environment: whether you're an allergy sufferer or not
  - Highly efficient: provides heat through floor-level outlets — whole areas are heated quickly
- 3801265/6

#### RINNAI ENERGYSAVER 561 FLUED GAS HEATER 4.8KW

- Heats up to 4.8kW
  - Flued gas heater
  - Maintains air quality for a healthy breathing environment
- 3801681/2

#### RINNAI ENERGYSAVER 1005 FLUED GAS HEATER

- Rinnai's highest heat output gas heater — 8.8kW
  - 4.8 energy efficient star rating, which is the highest in its class
- 3800354/5

## GAS FIRES

FIRE BY **escea.**

Escea is a classic New Zealand success story. Beginning in Dunedin in 2002, Escea's founders, Nigel Bamford, Alan McGregor and Garth Milmine, started with a single idea: that a fireplace should not only be efficient and easy to use, but should also be a thing of remarkable beauty. Since then, Escea has become a well-established industry leader in the design, manufacture and export of leading-edge indoor and outdoor gas and wood fireplaces. Escea fireplaces are renowned for their modern, minimalist styling, heating efficiency and ease of use.

All gas fires available in LPG or natural gas.

# Rinnai

Rinnai is passionate about bringing you the best possible fireplace performance and ambience. By combining leading technology with design inspired by New Zealand landscapes and architecture, we've made that happen. Manufactured right here in New Zealand, all Rinnai fireplaces reflect our unique Kiwi way of life and perform to Rinnai's exacting standards. Rinnai gives you the gift of fire.

## RINNAI COMPACT 2 GAS FIREPLACE

- Heats up to 5kW
  - Overheat switch and flame failure detectors are part of the safety specifications
  - Quickly and effectively disperses the heat
  - Easy installation: shallow firebox will fit most existing fireplaces
  - Operation is easy push button controls
  - Range of frame options; Matt Black Steel, Matt Black Steel with Stainless Steel Inner, Stainless Steel and Traditional Matt Black Steel
- 3801897 (TRADITIONAL PICTURED)

## RINNAI NEO INBUILT GAS FIREPLACE

- Heats up to 7kW
  - Simplistic design, will easily fit in with home decor
- WITH BLACK ON STAINLESS STEEL INNER & TRIM  
4253072/73

## RINNAI EMBER 600 GAS FIREPLACE

- Heats up to 5kW
  - Suitable for new builds and renovations
  - 2 burn media options
  - 3-sided and 4-sided frame options
  - Large viewable flame area
  - Available in two sizes (600mm wide and 700mm wide)
- WITH TITANIUM FRAME  
3800946/7 **3 SIDED**  
3800948/9 **4 SIDED**

## RINNAI ARRIVA 752 GAS FIREPLACE

- Heats up to 7kW
  - Elegant and stylish: with 6 beautiful fascia options and modern quartz or black pebble burn media, the Arriva 752 will look amazing in your living room
- WITH BLACK INNER ON STAINLESS STEEL OUTER FRAME AND WHITE QUARTZ BURN MEDIA  
4250300/1

## WOOD FIRES

Wood Fires can be an environmentally friendly heat source as they use a sustainable fuel source and are often less expensive to run than electric alternatives with the added bonus of heat to your room, even when there is no power.

Many wood fires now also come with the additional benefits of colour options to fit any décor and cook tops to heat your food or kettle, perfect for a cosy night in.

Should you decide to buy a wood fire please be aware there are some regulations in place around New Zealand. Please check with your local council on the clean air requirements for your area.

Heat transfer kits are a great add on option for wood fires delivering excess heat to other rooms such as your bedroom so you don't have to leave a nice warm room.

### SERENE ULTRA LOW EMISSION BURNER

- 8.5kW Maximum average output
- 8mm steel cook top
- Approved for all zones
- Built in ash scoop
- Optional water heater available
- Price includes standard Heat Saver Flue kit and Shield
- 2 year consumable parts warranty

7727246

A Woodsman fire does more than heat the entire home. It can also heat water which saves considerably on power bills. It can provide a level of comfort and security against the possibility of electricity restrictions or outages. In such emergencies a Woodsman stove model will not only provide welcome heat and light, it will also become a very effective cooktop.

### COLERIDGE ULTRA LOW EMISSION BURNER

- 8.9kW Maximum average heat output
- 6mm Carbon Steel Fire box
- Clean air and ULEB approved (All Zones)
- Pedestal or Leg Base options

Everything ESSE know about cooking and heating distilled into an iconic range of cook stoves.

ESSE has been hand-building range cookers and stoves since 1854, with an absolute commitment to quality and performance. ESSE products have been relied upon in some of the world's most demanding environments – from the kitchens of the Savoy, the unforgiving wilds of the Antarctic Tundra, to the Houses of Parliament in London, through the harshest conditions in New Zealand and Australia, they are built to last.

#### ESSE 700

## JAYLINE

Jayline are a Nelson based company and therefore understand the needs of Kiwi homes, which has allowed them to design wood fires specifically for New Zealand homes. They have seen many changes to wood fires over their 45 years but have ensured they maintain quality, innovation and service.

Masport offers a large selection of fire that can be installed in all the regions of New Zealand. All the Masport models meet the National Environment Standards (NES), which require minimum efficiency of 65% and less than 1.5g/kg of particulate emissions from burnt dry wood. Masport also offers Ultra-Clean models that meet the Real-life Emission Standards imposed in Environment Canterbury and Nelson regions.

### R3000 LEG WOOD FIRE

- Suitable for small to Medium Homes (2 to 3 Bedrooms)
- 6mm steel baffle lasts longer lowering running costs
- NES, ECAN and ORC Airshed 1 clean air approved
- 6mm radiant cook top
- Also available in Pedestal and Wood Stacker base options

7728853

### R5000 PEDESTAL WOOD FIRE

- Suitable for Large Homes (4+ Bedrooms)
- 6mm steel baffle lasts longer lowering running costs
- NES, ECAN and ORC Airshed 1 approved
- Built in easy clean ash pan
- Extended burn time
- 8mm radiant cook top
- Also available in Leg Base

7728859

### I7000 RURAL INBUILT WOOD FIRE

- Suitable for Large homes (4+ bedrooms)
- For Zero Clearance installation
- Expansive viewing window
- 6mm steel baffle lasts longer lowering running costs
- Must have ducted air vents for efficient heating

7728875

### AKAROA WOOD FIRE

- Reimagines the traditional fireplace, offering a sleek, European design while retaining the warmth and heart of a family wood burner
- Suitable for small to medium homes (2 to 3 bedrooms)
- 6mm steel baffle lasts longer lowering running costs
- NES, ECAN and ORC Airshed 1 approved
- Built in easy clean ash pan
- Radiant cook top

7728867

## CENTRAL HEATING

A central heating system provides warmth to the whole home from one main source distributing to multiple rooms.

It offers the ultimate control as you can set different temperatures for different zones to suit individual comfort levels or requirements of the room.

Central Heating also improves home ventilation and reduces condensation allowing for an all round healthier home.

You can select the added benefit of being able to control your thermostat from your phone.

It offers radiant cooling to houses planning to have underfloor hydronic warm water central heating. It's not air conditioning, but a more comfortable cooling sensory relief, more comfortable to the human body than cooling the air.

## CENTRAL HEATING OPTIONS FOR YOUR HOME

Central Heating is one of the best ways to effectively and efficiently heat your home.

Central Heating systems comprise of either forced air — where warm air is delivered to each room via a ducted system — or with a reticulated system, where warm fluid heats radiator panels located in each room.

### CENTRAL HEATING BENEFITS:

-  You can control the temperature with the thermostat and use the timer to set auto on and off.
-  Many systems are zone-controlled which allow setting different temperatures in different rooms simultaneously.
-  Central heating can reduce moisture in the home without the need for a ventilation system.
-  Central heating can be a discrete way of heating as the heat source is located out of the way on room exterior walls.
-  Some forced air systems have the ability for 'add on' cooling components for use in the summer.
-  Using the same air-to-water heat pump for warming the floor slab in winter, your heat pump can also switch into reverse cycling cooling mode for ultimate cooling relief throughout your home.

# GAS CENTRAL HEATING

Bonaire gas ducted central heating system has the ability to heat your whole house in just ten minutes, and control the temperature in four zones independently, Bonaire is a cost-effective, energy efficient home heating option with the key benefits of no unsightly wall fixtures and My Climate Wi-Fi app control.

Enquire in branch or via [heating@placemakers.co.nz](mailto:heating@placemakers.co.nz) for a design and quote.

## BONAIRE RHINO

- 4 star energy efficiency ratings
- Quick and simple changeover
- Compatible with MyClimate Wi-Fi control
- 4 zone control board as standard\*\*
- Option of an 8 zone system for total comfort and maximum efficiency\*\*\*

7731862 (30KW)  
7731863 (20KW)

## BONAIRE MB4

- Modulating gas valve = reduced energy bills
- Integrated four zone control standard\*\*\*
- Unit can run as low as 10% of its total capacity
- Induced draft combustion for improved energy efficiency
- Electronic ignition — no pilot light
- Quiet efficient operation
- Option of 8 integrated zones
- Easy installation

7731846-51

## BONAIRE MB5

- 5 star energy efficiency rating
- Non condensing eliminating the need for a condensate drain
- Modulating gas valve
- Integrated four zone control standard, heat only the rooms you need when you need them\*\*\*
- Option of an 8 zone system for total comfort and maximum efficiency\*\*\*
- Selected models available in ULPG

7731853-6

## BONAIRE MB6

- 6 star efficiency rating
- High efficiency four stage heat exchanger
- Automatically adjusts the gas rate as your home reaches set temperature
- Auto adjusting room air fan
- 4 zone control board as standard so you can heat only the rooms you need\*\*
- Option of an 8 zone system for total comfort and maximum efficiency\*\*\*
- Selected models available in ULPG

7731857/8, 7731860/1

\*Bonaire recommends that a Bonaire Rhino 4,5 or 6 star heater changeover installation is installed with a Navigator hard wired or remote control to enable modulation function. \*\*4 Zones standard with 4, 5 and 6 units with an option for 8. Zone motors supplied and installed by air conditioning retailer at additional cost. \*\*\* Zone dampers and motors supplied by installer at additional costs.

# Rinnai

Rinnai transforms a house into a home. Life into living. Comfort into experience. A reputation for innovation, reliability and quality for over 50 years has led to Rinnai being recognised as the leading New Zealand gas ducted heating solution.

Each Rinnai or Brivis heating system is tailored for New Zealand homes and is guaranteed to provide your home with warm, cosy air for many years. The beauty of central heating is what you don't see, it's all hidden within the walls of your home — just vents to let the heat out and a controller to deliver controllable warmth to the whole home.

Enquire in branch or via [heating@placemakers.co.nz](mailto:heating@placemakers.co.nz) for a design and quote.

## BUFFALO BX3 SERIES

- The Rinnai Buffalo external weatherproof units have been reliably keeping New Zealanders warm for over 35 years
- Natural gas connections only
- 5 year parts and labour warranty

## BUFFALO BX5 SERIES

- The Rinnai BX5 5 star heater has been designed with efficiency and reliability in mind. The perfect solution for replacing your existing Buffalo but with the improved 5 star energy rating
- 2 speed flue fan
- 5 year warranty

## RINNAI SP5 SERIES

- The Rinnai SP5 series delivers excellent efficiency while using less gas to heat your home, all without the need for drains. Rinnai can now not only deliver a 5 star rating without producing condensate, but can offer a cheaper way of getting 5 star efficiency without compromising on quality
- Rinnai ZonePlus™ compatible
- Supports Rinnai Touch Wi-Fi
- 5 year parts and labour warranty
- Two natural gas models available; 21kW or 30kW

## RINNAI SP6 SERIES

- Rinnai's most efficient range, the SP6 series is cleverly engineered to use less gas than traditional ducted gas heaters. This is achieved through Quattro technology, a superior 4-pass heat exchanger with modulating gas valve — meaning you get superior temperature control and greater efficiency
- Highest possible gas energy rating
- Rinnai ZonePlus™ compatible
- Reduced carbon emissions
- Supports Rinnai Touch Wi-Fi
- 5 year parts and labour warranty
- ZonePlus™ allows you to have up to four individually controlled zones. ZonePlus™ can be achieved with a combination of products (Touch or Network controllers and/or sensor units, and one damper for each zone), which are best discussed during your home appraisal

# WARM WATER CENTRAL HEATING

**ENJOY THE FEELING OF SUMMER ALL YEAR ROUND WITH WARM-WATER CENTRAL HEATING. THE MOST EFFICIENT AND EFFECTIVE WHOLE-HOME HEATING SOLUTION.**

Enjoy the benefits of heating your whole home evenly, eliminate cold spots, drafts and damp. Tailor a heating system to your home for a more efficient system than other heating options. We offer a range of heat sources and heat emitters with easy to use controls producing a completely silent heating system.

## CENTRAL HEATING CONTROLLERS

A thermostat monitors the room temperature and switches the heat source off when it's warm enough, then turns it back on again if the room temperature drops. Other central heating controls include timers that turn the boiler on or off at set times and programmers that allow you to adjust temperatures for different days of the week. Another popular option is a smart thermostat. These work remotely via your mobile device or computer, so you can adjust the temperature in your home, even when you're not there.

Radiators provide a responsive and flexible heating option for both new and existing homes. They heat up and cool down quickly, so are ideally suited to New Zealand's changeable weather conditions and the typically busy lifestyles of New Zealanders.

### ARROLL DESIGNER RADIATOR

- Combine classic beauty and authentic craftsmanship
- 24 models available
- Modular design
- Available in a variety of colours

Special ordered product (Enquire in branch or via [heating@placemakers.co.nz](mailto:heating@placemakers.co.nz) for options)

### MULTICOLONNA DESIGNER RADIATORS (DELONGHI)

- Compliments contemporary and traditional settings
- Horizontal and vertical models available
- 2 to 6 columns deep
- Up to 3000mm high and 2786mm long

Special ordered product (Enquire in branch or via [heating@placemakers.co.nz](mailto:heating@placemakers.co.nz) for options)

### KORADO LINE RADIATOR

- Contemporary design that compliments modern home decor
- 25 year functional warranty
- 8 port radiator for flexible installation
- Horizontal and vertical models available

Sizes available: Height 400 and 900mm, Length 600 to 1800mm

### DELONGHI STEEL PANEL RADIATOR

- Practical and silent
- 25 year functional warranty
- Low surface temperature
- Easy fit wall brackets included

Sizes available: 300mm to 900mm high, 400mm to 3000mm long

**Note:** Radiators are sold as part of a central heating system and require a heat source. Radiator output is based on the following condition: 80/60/20 — flow temperature/return temperature/room temperature.

**INVEST IN YOUR COMFORT WITH THE LATEST HEAT PUMP TECHNOLOGY**

Made in Japan for Central Heating New Zealand, Chofu air-to-water heat pumps are ideal for warm water underfloor heating/cooling, radiator heating and domestic hot water production. With heating technology that boasts higher efficiencies, lower operation costs and more eco-friendly features than traditional heating methods, the Chofu range has become a popular option across New Zealand. Chofu heat pumps are world leading with patented anti-frost technology that ensures high performance is maintained in temperatures as low as -20°C.

**CHOFU AIR-WATER HEAT PUMP**

- 6, 10 & 16kW hydronic heat pump
- Manufactured in Japan
- Inverter compressor
- R32 refrigerant gas
- Max flow temperature of 60°C, min outside air temperature -20°C
- 5 year warranty

- 6KW** 7728381 (Heat pump only)
- \*10KW** 7718283
- \*16KW** 7728380

\*Includes pump, expansion vessel, and pressure gauge

Gas, Diesel & Biomass boilers also available.

**BAXI**

**HOT WATER**

Unlike many other methods of heating the home, central heating systems can provide both home and hot water heating with one system. By adding hot water heating to your central heating system, you can save up to 70% on your hot water heating costs.

**BAXI HWC INDIRECT COIL CYLINDERS (SINGLE & TWIN)**

- 50mm insulation
- Built-in control stat for boiler or heat pump
- Includes TPR Kit
- Includes electric Element 3kW
- Available in 300L Twin Coil Cylinder

**200L** 7615494

**300L** 7615496

**300L Twin Coil Cylinder** 7615497

**COOLING**

We need heating around 200 days of the year but during the warmer summer months, a little cooling is needed to take the edge off those warm days. Cooling dwellings and office spaces using water-based delivery systems have been used extensively around the world for decades, but now an addition to the technology is using floor, wall, and ceiling surfaces with water pipes to radiantly cool. Consider adding cooling to your new or existing heatpump/underfloor central heating system.

## RADIANT HEATING AND COOLING

Waterware's expertise is in radiant heating and cooling. This type of comfort management has many benefits, and it's the underlying reason why Waterware has developed mastery in this area with three technologies available for commercial and residential applications; Active Ceiling, Underfloor and Radiators. These systems all provide a uniformity of temperature, are silent, healthy, and represent a low running cost option for home or commercial heating and cooling solutions. With no air blowers there is no air movement, and no recirculation or collection of dust particles - resulting in cleaner air. All systems can be efficiently managed through a centralised controller that caters to zoning requirements. This allows you to minimise any wasted heat. Flexibility is also provided where either electric, gas, or diesel boilers - which support the radiant energy systems - can be installed depending on the available services in your area.

### 1 ACTIVE CEILING

Active Ceiling is a heating and cooling system which is concealed behind the ceiling drywall sheets, making it completely out of sight and out of mind. Warm or cool water is circulated through the ceiling panels, which adds or removes energy from the space below.

Designed and manufactured in Italy, the innovative conditioning system provides an environment of unique thermal comfort and health throughout your home. The temperature delivered by the radiant energy based system is thus more uniform and the air is healthier without compromising functionality and aesthetics. As a result, those who invest in Active Ceiling get to enjoy a healthier form of heating and cooling for their home or business.

Scan for more information

### 2 UNDERFLOOR

Underfloor heating and cooling is a form of radiant energy which achieves indoor climate control and thermal comfort through even temperature distribution. It offers an invisible solution whereby the pipe system is installed below the surface of the floor, allowing the freedom to design creative, flexible, and spacious interiors.

The water based (hydronic) underfloor heating and cooling system is located underneath your floor which provides an even distribution of temperature throughout your home from the floor upwards.

This in-turn creates a consistent temperature and resulting thermal comfort day and night.

### 3 AROTHERM PLUS HEAT PUMP

The aroTHERM Plus Heat Pump provides heating and hot water from renewable energy. It's perfect for both new build and retrofit properties that demand low running costs, high efficiency, and an environmentally friendly solution.

- The aroTHERM Plus Heat Pump is an outdoor unit which comes in a variety of outputs to suit every property
- Ultra high efficiency air to water heat pump
- Low noise level (35dBA @4meters) ensures quiet operation for the comfort of home owners and neighbours
- Quick and easy to install
- Two models available; 9kW and 16kW

### 4 UNITOWER

Indoor unit is a compact, attractive solution with all system components inside one tall unit for simple installation, and ideal for properties with limited space.

It provides comfort in domestic hot water, with an integrated tank of 188L of capacity, with a maximum efficiency A+ for an XL demand profile with guaranteed significant energy savings.

- Heating system components integrated within the unitTOWER
- 188L cylinder capacity delivers up to 380L of hot water for up to five people including the use of rainfall showers
- Quick and easy installation within just one day

### 5 VRC700 CONTROLLER

The thermostat controller sets the schedule for heating, cooling, and hot water performance. In the winter time it uses temperature compensation to maximise comfort and minimise running costs, whilst in summer it uses dew point management to prevent condensation on the chosen solution.

Scan for more information

### 6 VENTO-EXPERT

The Vento-Expert is equipped with a humidity sensor for indoor humidity control. If the humidity increases above set point, the unit adjusts its speed setting. It can either operate as an independent unit or be connected with other units and controlled via a master unit.

- Up to 93% heat recovery for apartments, houses, offices, and commercial spaces
- Supplies fresh dry air and removes stale damp air while recovering 93% of internal heat
- Prevents heat loss and excessive moisture caused by opening windows
- Whisper quiet operation from 11DBA
- Controls internal humidity levels for optimum health and comfort

## HOME VENTILATION & HEAT TRANSFER

Ventilation helps the circulation of fresh air through your home. It allows moisture and airborne pollutants to escape, and fresh clean air to be drawn into your home resulting in better air quality.

The importance of ventilation in our homes is often overlooked but the benefits are clear and significant in keeping your family healthy. These benefits include preventing mould & mildew, protecting against dust mites and reducing vapour and moisture which in turn reduce the risk of virus infection, asthma and other respiratory problems. This section of catalogue highlights PlaceMakers's range of ventilation systems with something to suit every home.

This section also outlines Heat Transfer options which can be a good add on to your chosen heating solution. They are a great way to utilize excess warm air from living rooms that feature solid fuel burners, to provide some heat to the bedrooms via a ducted system in the ceiling.

## HOME VENTILATION SYSTEMS

### VENTILATION PREVENTS CONDENSATION BUILD UP IN YOUR HOME, BUT WHAT DOES THIS MEAN?

Condensation forms on a surface when the temperature of that surface is below the dew point of the surrounding air. As air cools, its relative humidity rises until it reaches a point where it is saturated and can no longer hold on to all the moisture. The temperature at which this occurs is the dew point and it will vary depending on the moisture content of the air.

Condensation in your home can result in mould & mildew build up which can damage your window frames and clothes. Dust mites and fungal spores thrive in warm, humid places often creating respiratory problems for your family.

This can be prevented by installing a home ventilation system which will provide better air quality and potentially save you money on your heating bills as drier air is easier to heat.

#### BENEFITS:

- 🏠 Positive indoor pressure reduces moisture in your home
- 🏠 Dry homes improve family wellbeing and reduce winter illness
- 🏠 Reduce your winter heating costs by utilising warm air from the ceiling
- 🏠 Reduced moisture prolongs the life of your home
- 🏠 Home ventilation filters the air you breathe

## HEATING SOLUTIONS MADE SIMPLE

SmartVent home ventilation systems create better air quality resulting in better health. The SmartVent home ventilation systems are future proofed with optional upgrades and extensions. This allows you to install a SmartVent system with peace of mind knowing that you can add-on features\* like fresh air intakes, heat transfer and extra outlets whenever it suits you or your budget.

\*Fresh air intake, tempering heater and heat transfer is not available for the lite ranges.

**QUALITY COMPONENTS**

SmartVent systems use superior quality fans, filters, ducts & diffusers to introduce air into the home.

**WHISPER QUIET**

SmartVent systems use top quality insulated, acoustic ducting to reduce air noise and retain temperature.

**PREMIUM FILTERS**

SmartVent systems use medical-grade F7 filters to capture dust, pollen and mould spores as standard.

**FIVE YEAR WARRANTY**

Backed by the manufacturer's 5 year warranty, SmartVent fans are truly reliable.

**SMARTVENT LITE RANGE**

- Centralised positive pressure ventilation
- Automated, fresh filtered air from the roof cavity to rooms
- Rental lock option to prevent users from switching off
- Incoming and in-room air temperature sensing – for your comfort
- Low-temperature protection and one-touch boost mode
- Expandable up to 12 rooms

# HEAT TRANSFER

## UTILIZE YOUR EXCESS HEAT

Heat Transfer systems are specifically designed to utilise your excess heat by transferring it from your source room, which is usually your lounge, and distributing it to other rooms in your home. If you have ever found yourself cosy in one room, while the rest of the house may be cold, then this is the system you need! By transferring your excess heat you are able to 'take the chill off' your bedrooms, and as a result create a warm comfortable environment for your family.

### HHS HEAT TRANSFER KIT

- Analogue thermostat controller
- 150mm 2 speed fan
- No extension kits
- Insulated ducting
- Circular "eco" ceiling diffusers
- 2 year warranty

<b>2 ROOM KIT</b> 7761656	
<b>*3 ROOM KIT</b> 7761654	

\*3 room kits can be expanded to four rooms upgrade kits are available

A Weiss Heat Transfer System is an efficient way to take the excess heat from your solid wood fire and transfer it to up to four other rooms. It uses a powerful fan and insulated ducting to transfer heat quietly through your ceiling cavity from the source room, to other rooms. The system is suitable for homes with a ceiling cavity with 500mm of space available. You then measure the distances between the source room and other rooms to work out how much ducting is needed.

### 125MM HEAT TRANSFER WITH DIGITAL THERMOSTAT

- Easy to install
- 12 metres (2 room) and 15 metres (3 room) of thermal rated 125mm insulated ducting included
- Inlet vent and outlet diffuser vents included
- Powerful and effective 3 speed booster fan operation
- 3 metres extension kit can be bought separately, all joining and junction parts included

## OUTDOOR HEATING

PlaceMakers Heating offers a selection of outdoor approved heating for areas small or large in electric, gas or fire pit models, to suit all your needs.

Kiwis love outdoor living but with unpredictable weather an outdoor heating solution is often required to take the chill out of the air.

Investing in outdoor heating allows you to stay comfortable outdoors and entertain all year round and create the perfect ambience for your family and guests.

Outdoor heating is also a great option for cafes, bars and public outdoor entertainment areas.

## MODERNO

CARBON INFRARED HEATER

The popular Moderno carbon infrared heaters generate heat only when required, allowing you to enjoy immediate warmth and comfort. They are up to 80% more efficient compared to traditional heating systems, thus reducing your running costs dramatically. There is no longer the need to pre-heat the air or risk the escape of warmed air. Suitable for outdoor and indoor usage, these heaters are compact and elegant in design, look great wall mounted or ceiling mounted and can accommodate all heating spaces.

### MODERNO CARBON INFRARED HEATER — STANDARD 2KW

- Can be mounted horizontal or vertical
- Efficient directional heat
- Odour and CO<sub>2</sub> emission free
- Periscopic remote control
- Automatic temperature control
- 4 power settings
- Golden ultra low glare
- Optional Telescopic stand\*

## HEATSTRIP®

HEATSTRIP® outdoor gas and electric heaters are proudly designed, engineered and supplied in Australia and exported to world markets. HEATSTRIP® has been engineering innovative, stylish and energy efficient products since 1988. With HEATSTRIP® innovative heating solutions there is no need to abandon the outdoor area or compromise your style with bulky unpleasant heaters. In Australia, many large venues enjoy the style and performance that HEATSTRIP® has to offer. While they are suitable for commercial use, our award-winning heaters are also ideal for residential alfresco areas.

#### HEATSTRIP® ELEGANCE

With superior technology & style, world-leading design and unique "off-white" colour, the new HEATSTRIP® Elegance will blend in with the white ceiling in your alfresco area.

- Electric radiant outdoor heater
- Slimline design and "off-white" colour
- New more compact and higher output design
- Corrosion-resistant for most environments
- Ideal for your protected outdoor alfresco area or indoor area
- 2 year residential warranty and 1 year commercial

**2400W** 7756183

**3600W** 7756184

#### HEATSTRIP® CLASSIC

Premium quality, stylish & slimline electric radiant heaters perfect for protected outdoor and indoor applications.

- Electric radiant heater ideal for your protected area, pergola, or difficult to heat indoor area
- Stylish, sleek, unobtrusive design with black front profile
- Corrosion protected for even the toughest environment
- Easy DIY installation for 2 models and multiple mounting options
- 2 year residential warranty and 1 year commercial warranty

**2400W** 7756178

**3200W** 7756179

#### HEATSTRIP® INTENSE

The HEATSTRIP® Intense Wall/Ceiling mounted electric infra-red heaters are a modern and attractive outdoor heating solution. The high temperature output of the HEATSTRIP® Intense is perfect for outdoor sites, high ceilings and hard to heat indoor applications. These heaters can be a feature to any outdoor area.

- Ideal for undercover protected and semi-exposed outdoor locations
- Easy DIY installation for 2200W unit, 3200W heater must be installed by a licensed electrician
- High quality construction with a new hexagonal grille
- Carbon filament infra-red heating element provides high performance instant heat
- 2 year residential and 1 year commercial warranty.

**2200W** 7756188

**3200W** 7756190

#### HEATSTRIP® MAX

Australian designed and engineered range of high intensity electric infra-red radiant heaters ideal for tough outdoor and indoor heating applications. The Max heater is a high temperature radiant heater with a unique low-glow, shatter proof heating element, perfect for outdoor alfresco areas, balconies, pergolas, veranda, courtyards, warehouses etc.

- High temperature electric radiant heater ideal for higher ceilings or more exposed locations
- Unique "low glow" Incoloy element – no more blinding light
- Commercial grade quality and construction
- Corrosion resistance provided by the anodized alloy casing
- Easy DIY installation for the THX2400 unit, THX3600 must be installed by a licensed electrician
- 2 year warranty

### HEATSTRIP® PORTABLE LPG HEATER

The HEATSTRIP® portable LPG heater incorporates world leading design, quality, heat performance and efficiency to provide a stylish, robust and elegant solution for your outdoor area, alfresco, balcony, patio etc.

- 34 MJ, 4 tile commercial quality ceramic burner to be used with a 9kg LPG bottle (not included)
- NEW Electronic finger pull ignition (battery operated), with tilt safety switch and flame failure device. Fully concealed gas pipes and bottle
- Heater head components made from high quality Stainless Steel with high temperature paint coating
- World class wind protection rating at 16 kilometres an hour
- Protective grille and reflector included as standard, to guarantee safe operation. Reflector design ensures that only a minimum of 500mm overhead clearance is required
- Components are sub-assembled for easy DIY Installation
- Suitable for residential and commercial applications

7756228

### HEATSTRIP® WALL MOUNTED NG HEATER

The new and upgraded HEATSTRIP® Wall mounted Natural Gas (NG) heater is a stylish addition to any outdoor area, where mains Natural Gas is preferred. World class design aesthetics, heat output and performance, for both residential and commercial applications.

- 34 MJ, 4 tile commercial quality ceramic burner, for connection to mains Natural Gas (NG)
- NEW Electronic finger pull ignition and flame failure device
- World class wind protection rating of 16 kilometres an hour
- Constructed from Stainless Steel with high temperature paint coating
- Protective grille and reflector included as standard, to guarantee safe operation. Reflector design ensures that only a minimum of 500mm overhead clearance is required. Optional accessories for low clearance or ceiling mounting are available
- Wall mounting bracket allows for multiple mounting angles, and is extremely robust to provide strength and support. Gas regulator included
- Available in LPG version (TGH34WLPG)

### PLATINUM SMART-HEAT™ GAS

The Platinum Smart-Heat™ Gas range represents the absolute pinnacle of outdoor heating. Combining elegant design with industry-leading technology, The Platinum Smart-Heat™ Gas series by Bromic delivers performance, reliability and beauty in equal measure.

Available in two sizes, 3 tile or 5 tile each with the ability to project a diffused radiant heat deep into open outdoor spaces, the Platinum Smart-Heat™ Gas series successfully overcomes wind resistance to create outdoor environments as warm as you need them to be.

7724657 (300 LPG), 7724658 (300 NG), 7724659 (500 LPG) & 7724660 (500 NG)

Heat deflector sold separately

### TUNGSTEN SMART-HEAT™ GAS

Our Tungsten Smart-Heat™ Gas heater has a durable, soft flowing curved fascia and engineered body, which produces formidable heat to create a truly comfortable outdoor space.

Available in two sizes, 3 tile & 5 tile. The Tungsten Smart-Heat™ Gas Series incorporates full function electronic controls, allowing them to be remotely operated. Patented screen and ionization probe technology enables remarkable wind resistance and with our 'Easy Pivot' arm they deliver even greater positioning, versatility and heat coverage. This heater also has a range of accessories available to provide versatility in mounting & controller options.

7724661 (300 LPG), 7724662 (300 NG), 7724663 (500 LPG) & 7724664 (500 NG)

Heat deflector sold separately

### PLATINUM SMART-HEAT™ ELECTRIC

The award winning Platinum Smart-Heat™ Electric series has been designed with low-clearance, semi-enclosed spaces in mind. With minimised light emissions and dedicated recess kits the Platinum Smart-Heat™ Electric blends seamlessly into your environment.

Available in both black and white, the Platinum Smart-Heat™ Electric is the epitome of style without compromise. Elegantly understated, the Platinum Smart-Heat™ Electric delivers 25% more heat with a much smaller footprint than the best of our competitors.

7724666 (2.3KW BLACK), 7724667 (2.3KW WHITE), 7724668 (3.4KW BLACK) & 7724669 (3.4KW WHITE)

Flush mounted recess kit sold separately

### TUNGSTEN SMART-HEAT™ ELECTRIC

Our Tungsten Smart-Heat™ Electric series offers high performance radiant heating to outdoor and semi-enclosed spaces alike, with an industrial design style. It also boasts a high-temperature coating to suit all environments. With a stainless-steel construction, its durable element will emit a soft red glow to create a warm ambience in your space.

With their industrial design style, robust chassis and high performance, the Tungsten Smart-Heat™ Electric series now comes with a lifetime element warranty.

7724674 (2KW BLACK), 7724675 (3KW BLACK), 7724676 (4KW BLACK) & 7724677 (6KW BLACK)

Heat deflector sold separately

### BROMIC SMART-HEAT™ CONTROLS

The Bromic Smart-Heat™ Wireless On/Off Controller can switch power supply to two separate outputs, enabling independent 'On/Off' control without even having to move from your seat.

**On/Off 4 Channel Remote\***  
(Gas & Electric) 7724688

### BROMIC SMART-HEAT™ CONTROLS

The Bromic Smart-Heat™ Wireless Dimmer Controller allows you to adjust the heat from 1-100% for perfect comfort and complete flexibility.
